Personal Statement

Third-year Computer Science student at MIU with strong full-stack development skills and a keen eye for UI/UX. Creative, collaborative, and comfortable working in teams to turn ideas into real products. I care about how things work *and* how they feel and I'm always looking to build something people actually want to use.

Education

Misr International University, Computer Science, Majoring in Software Development

Third Year [2023 – present]

Relevant Coursework: Software Project Management, Software Engineering, Principles of Software Design, Web Development, Human-Computer Interaction, Algorithms, Data Structure, OOP, Database, Problem Solving

Experience

El Araby Summer Internship

[August – September 2025]

Interned in the Digital Solutions team with a focus on UI/UX design. Gained hands-on experience contributing to real-world projects, including user interface research, wireframing, prototyping, and design improvements for digital products used by actual customers.

Personal Projects

Shoflak Klba App, [In Development – Targeting Play Store & App Store Deployment]

- Developing a full-stack platform to facilitate pet breeding connections and community engagement, featuring distinct interfaces for pet owners and administrators.
- Implemented robust CRUD functionality for pet listings, a real-time messaging system with user-driven content reporting, and secure social authentication (Google & Facebook).
- Enhanced user experience with Dark Mode support and multi-language localization (English & Arabic).
- Includes a comprehensive admin dashboard for listing moderation, user management, and support inquiry handling, alongside push notifications powered by Firebase.
- Designed the entire UI/UX using Figma, focusing on a mobile-first, user-friendly experience.
- Designed and deployed a dedicated landing page for the app: <https://shoflakklba.vercel.app/>
- Tools Used: React, TypeScript, Tailwind CSS, Capacitor, Supabase (PostgreSQL, Realtime, Auth), Firebase (Cloud Messaging), Figma

University Projects

Car Rental Management System, [Winner of the Best Project in Problem Solving Course] – First Year

- Developed a Car Rental Management System in a group of 4 colleagues. To manage customer bookings, vehicle availability, and rental transactions. Implemented features such as user-friendly interface for adding, removing and updating cars.
- Tools Used: C++

Calculator, [Winner of the Best Project in Digital Logic Design Course] – First Year

- Created a Calculator in a group of 5 colleagues, designing the entire logic using gates and built a hardware model to perform basic operations.

Library Management System, [Completed as Part of Object-Oriented Programming Course] – Second Year

- Built a Library Management System in a team of 5 colleagues to manage book inventory, user accounts, and borrowing records. Included functionalities for the admin to add, update, and remove books, as well as manage borrowers and track book availability.
- Tools Used: Java, JavaFX

Restaurant Website, [Completed as Part of Web Development Course] – Second Year

- Developed a Full-stack website in a group of 5 colleagues, The platform features a responsive design with separate interfaces for customers and administrators. include an interactive menu management system, real-time reservation handling, accounts management, and a comprehensive admin dashboard.
- Tools Used: HTML, CSS, JavaScript, Node.js, Express, MongoDB

Schedule Timetable Management System, [Completed as Part of Software Engineering Course] – Third Year

- Developed a schedule and timetable management system as part of the Software Engineering course. The platform allows administrators to create, manage, and organize class schedules efficiently, with features for conflict detection, room allocation, and dynamic timetable generation.
- Tools Used: PHP, HTML, CSS, JavaScript, SQL

Dino Game with Eye Tracking, [Completed as Part of Human Computer Interaction Course] – Third Year

- Recreated the classic Chrome dinosaur jumping game with a twist instead of pressing the spacebar, players control the jump by blinking.
- Tools Used: Python, Flask, OpenCV, HTML, CSS, JavaScript

Certifications

Foundations of User Experience (UX) Design

[Google – Coursera]

Course 1 of 7 in the Google UX Design Professional Certificate. Covers the basics of UX design, including user-centered design, design sprints, and the role of a UX designer.

Start the UX Design Process: Empathize, Define, and Ideate

[Google – Coursera]

Course 2 of 7 in the Google UX Design Professional Certificate. Focuses on empathizing with users, defining pain points, and ideating design solutions.

Skills

Languages: Arabic, English

Programming Languages / Tools: C++, Java, SQL, HTML, CSS, JavaScript, Python, React, PHP, TypeScript, Tailwind CSS, Capacitor, Supabase, Firebase, SQL, MongoDB, Node.js, Git, Figma

Software: Microsoft Office Suite, Photoshop, Video Editing
