Personal Statement

I am a second-year Computer science student with a strong passion for technology and problem-solving. I thrive in environments that challenge me to think critically and with creativity, whether it's through coding, designing algorithms or working collaboratively on innovative projects.

Education

Misr International University, Computer Science

Second Year [2023 – present]

Relevant Coursework: Web Development, Algorithms, Data Structure, OOP, Database, Problem Solving

Projects

Car Rental Management System, [Winner of the Best Project in Problem Solving Course] – First Year

- Developed a Car Rental Management System in a group of 4 colleagues. To manage customer bookings, vehicle availability, and rental transactions. Implemented features such as user-friendly interface for adding, removing and updating cars.
- Tools Used: C++

Calculator, [Winner of the Best Project in Digital Logic Design Course] – First Year

- Created a Calculator in a group of 5 colleagues, designing the entire logic using gates and built a hardware model to perform basic operations.

Library Management System, [Completed as Part of Object-Oriented Programming Course] – Second Year

- Built a Library Management System in a team of 5 colleagues to manage book inventory, user accounts, and borrowing records. Included functionalities for the admin to add, update, and remove books, as well as manage borrowers and track book availability.
- Tools Used: Java

Hangman Game, [Completed as Part of Data Structures Course] – Second Year

- Developed a classic Hangman game using C++ in a group of 5 colleagues, focusing on efficient data structures for word selection and gameplay logic. Designed and implemented a graphical user interface using SFML to enhance interactivity and user experience.
- Tools Used: C++, SFML

Restaurant Website, [Completed as Part of Web Development Course] – Second Year

- Developed a Full-stack website in a group of 5 colleagues, The platform features a responsive design with separate interfaces for customers and administrators. include an interactive menu management system, real-time reservation handling, accounts management, and a comprehensive admin dashboard.
- Tools Used: HTML, CSS, JavaScript, Node.js, Express, MongoDB

Skills

Languages: Arabic, English

Programming Languages / Tools: C++, Java, SQL, HTML, CSS, JavaScript, Python, SQL, MongoDB, Node.js, Git

Software: Microsoft Office Suite, Photoshop, Video Editing

Hobbies / Interests

Tennis Player / Coach
